### SECTION 5. FIRE FIGHTING MEASURES

<b>Suitable Extinguishing Media</b>	Foam, Powders, Carbon dioxide
<b>Specific Hazards Arising from the Substances of Mixture</b>	Incomplete combustion may form carbon monoxide. May generate ammonia gas. May generate toxic nitrogen oxide gases. Burning produces noxious and toxic fumes. Downwind personnel must be evacuated.
<b>Special Protective Equipment for Firefighters</b>	Use personal protective equipment. Wear self-contained breathing apparatus for firefighting if necessary
<b>Further Information</b>	Do not allow run-off from firefighting to enter drains or water courses. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

### SECTION 6. ACCIDENTAL RELEASE MEASURES

<b>Personal Precautions, Protective Equipment, and Emergency Producers</b>	Wear suitable protective clothing, gloves, and eye/face protection. Avoid breathing vapors/mist/gas. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas. For personal protection see section 8.
<b>Environmental Precautions</b>	Prevent further leakage or spillage if safe to do so. Do not let product enter drains. Discharge into the environment must be avoided.
<b>Methods and Materials for Containment and Cleaning-up</b>	Soak up with inert absorbent material and dispose of as hazardous waste. Keep in suitable, closed containers for disposal.
<b>Additional Advice</b>	For disposal see section 13.

### SECTION 7. HANDLING AND STORAGE

<b>Precautions for Safe Handling</b>	Avoid contact with skin and eyes. Avoid inhalation of vapor or mist. Put on appropriate personal protective equipment before handling. Keep away from sources of ignition - No smoking. Take measures to prevent the buildup of electrostatic charge.
<b>Conditions for Safe Storage</b>	Store in cool place. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage.
<b>Hygiene Practice</b>	Eating, drinking and smoking should be prohibited in areas where this material is handled. Wash hands thoroughly after handling.

### SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

### Engineer Controls

Use process enclosures, local exhaust ventilation, or other engineering controls to keep worker exposure to airborne contaminants below recommended exposure limits.

Wear appropriate personal protective equipment where such systems are not effective to perform satisfactorily and meets OSHA or other recognized standards. Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

### Personal Protection Equipment -

#### Eye/Face Protection

Tightly fitted safety goggles.  
Face shield (8-inch minimum).  
Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

#### Skin Protection

Handle with gloves. Gloves must be inspected prior to use.  
Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product.  
Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices.  
Wash and dry hands after handling or before eating, drinking, or smoking.

#### Body Protection

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves.  
This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers.  
It should not be construed as offering an approval for any specific use scenario.  
Impervious clothing.  
Closed-toe shoe.  
Flame retardant antistatic protective clothing.

#### Respiratory Protection

The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.  
Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multipurpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls.  
If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

### Environmental Exposure Controls

Prevent further leakage or spillage if safe to do so.  
Do not allow product enter into sewers or waterways.
